

**Product Family**  
**Honeywell HW200 ADF**  
**Welding Helmet**

Ideal for more experienced welders, the HW200 Auto Darkening (ADF) welding helmet incorporates a high-quality filter with a sleek and lightweight helmet shell, and features solar-powered adjustable Shade 9-13 ADF technology for advanced welding applications. The HW200 also features sensitivity and delay adjustments for customizable filter settings. When a welding job requires more than a standard passive filter, ADF helmets provide greater protection, superior comfort and eliminate the need for constant adjustments, allowing for more time spent welding.

**Packaging Information**  
**HW200**  
Case Quantity: 4  
Unit Dimensions:  
11.7" x 9.85" x 9.45"  
Case Pack Dimensions:  
24" x 10.24" x 20.1"  
UPC: 883940151489

### Key Features

- Grind Mode functionality that ensures the ADF will not darken when used during clean-up work.
- Sensitivity adjustment that gives the wearer the option to adjust the filter's sensitivity to avoid unwanted darkening from ambient light conditions.
- An easy ratchet adjustment system for personalized fit and total comfort.
- Replaceable, padded sweatband.
- A design that accommodates many safety eyewear and respiratory products.
- Viewing Area: 7.2" (3.8" x 1.9" / 97mm x 47mm)
- Operating temperature range: -10° C to +55° C (+14° F to +131° F)

### Recommended Industries/Use

- Welding

### Hazards

- Welding Flash

### Warranty Information

Two year warranty on auto darkening filter.

## Specifications

#### ANSI Z87.1-2010

- Certified to the requirements of ANSI Z87.1-2010 standards.

#### CSA Z94.3

- Tested by Honeywell to meet the requirements of the CSA Z94.3 standard
